| <input type="checkbox"/> Interrupts or intrudes on others (butts into conversations or games). | 0 | 1 | 2 | 3 |

Adapted from Diagnostic Statistical Manual of Mental Disorders Fifth Edition, American Psychiatric Association, 2013

Predominantly Inattentive Presentation – 6 or more of the symptoms of inattention have persisted for at least 6 months to a degree that is inconsistent with developmental level and that negatively impacts social and academic/occupational activities.

Predominantly Hyperactive Presentation – 6 or more symptoms of hyperactivity/impulsivity have persisted for at least 6 months to a degree that is maladaptive and inconsistent with developmental level.

Combined Presentation – 6 or more symptoms of both inattentive Presentation and hyperactive/impulsive Presentation.

Some symptoms must be present before age 12.

Symptoms do not occur exclusively during the course of schizophrenia or another psychotic disorder and are not better explained by another mental disorder (such as mood disorder, anxiety disorder, dissociative disorder, personality disorder, substance intoxication or withdrawal)
